

PROJECT PIPELINE

Thank you for viewing **The Jacobson Group's active openings**. If you or someone you know may be a match for any of the projects listed below, please contact us at your earliest convenience or submit your referral [here](#).

JACOBSON

OPEN PROJECTS

Property and Casualty IT Operations Specialist	This role joins an Optimization and Transformation team as an Operations Specialist focused on improving insurance operations across underwriting, sales, claims and shared services. Responsibilities include leading discovery sessions, mapping end-to-end workflows, identifying bottlenecks and helping design future-state operating models that support platform migrations, digital transformation and automation, as well as partnering closely with field teams to drive continuous improvement, translating business needs into clear requirements and supporting adoption of new processes and tools. Ideal candidates bring 5+ years of insurance operations experience, strong stakeholder engagement skills and hands-on process analysis and mapping capability.
Property and Casualty IT Business Analyst	A dynamic organization is seeking a Business Analyst to support Commercial Property and Casualty insurance initiatives in a hybrid role based in Ohio. Responsibilities include planning and facilitating requirements-gathering sessions with stakeholders across underwriting, claims, policy administration, billing, product and distribution, translating needs into clear functional and technical documentation, such as user stories, acceptance criteria, process flows and related artifacts, and partnering with project managers and delivery teams throughout the SDLC. The role also includes supporting backlog refinement, testing and UAT while managing requirement changes and communicating impacts. The ideal candidate brings 3–5 years of P&C-focused BA experience, Agile/Scrum familiarity, strong writing and communication skills and comfort with data analysis and tools such as Jira, Azure DevOps and Confluence.
Life Underwriting Consultant	This is a remote Life Underwriting Consultant role with \$2 million in signing authority, providing short-term capacity support by underwriting individual life applications during elevated demand while delivering fast, accurate decisions and maintaining quality and compliance. Responsibilities include assessing mortality risk using multiple evidence sources, such as EHRs, APS, LifeScore, labs, MVR and prescription histories, determining when additional evidence is needed and placing evidence orders, rendering underwriting decisions within established authority, including higher face amounts, documenting clear audit-ready underwriting notes, partnering with underwriting leadership, operations and vendors to keep cases moving, and managing tight turnaround times in a high-volume queue. Requirements include 5+ years of life underwriting experience, strong EHR, APS and LifeScore interpretation skills and the judgment to independently drive evidence and decisions.
Life Alfa Modeling Actuary	This is a remote Alfa Modeling Actuary role supporting a valuation team through year-end regulatory reporting by maintaining and running ALFA actuarial models. Responsibilities include rolling forward in-force models to the current valuation date, executing multi-scenario valuation runs for annuity and life blocks, reviewing results for reasonableness, investigating anomalies and troubleshooting model issues through resolution, as well as translating ALFA output into Excel-based frameworks that reflect reinsurance mechanics, streamlining and cleaning up existing Excel files, packaging results and supporting exhibits for review and coordinating closely with valuation actuaries to stay on schedule. Requirements include strong hands-on ALFA modeling experience, annuity product knowledge, with FIA/GMWB a plus, advanced Excel skills, familiarity with AG-55 work and an ASA or FSA designation.
Health Senior Director, Health Plan Care Management	This is a remote Senior Director, Health Plan Care Management role requiring up to one week per month onsite in Colorado, leading a 40–50 person care management organization through a transition while keeping day-to-day operations steady. Responsibilities include setting priorities, driving accountability and coaching leaders, optimizing HealthEdge workflows and data use, overseeing coordination across medical, behavioral health, provider and delegated vendor networks and ensuring compliance with CMS, Medicaid, NCQA, state DOI and contractual requirements, as well as supporting audit readiness and corrective actions and tracking and reporting quality, productivity and risk metrics to senior leadership. Requirements include a bachelor's degree, 7+ years in managed care or health plan administration, 3+ years of people leadership, strong care management operations knowledge and advanced Excel skills, including pivoting, formulas and visualization.
Health Behavioral Health Medical Director	This is a remote, part-time Behavioral Health Medical Director role requiring about 20 hours per week, ideally Tuesday, Wednesday and Friday during Eastern time, with no weekend work. The focus is primarily adult psychiatry with a heavy emphasis on substance use cases. Responsibilities include conducting utilization and coverage reviews, applying InterQual and ASAM guidelines, documenting determinations to meet regulatory and accreditation requirements, completing peer-to-peer discussions with treating providers as needed, and making medical-necessity decisions for appeals and grievances and supporting quality and accreditation initiatives. Requirements include an MD or DO, board certification and a current unrestricted Pennsylvania physician license, along with 5+ years of post-residency clinical experience and 3+ years of managed care, utilization review or quality management experience.
